

# Project GRANDCONNECT

Teaching Grandparents  
How to Use Smartphones

By Arshi Bansal

# INTRODUCTION

Many senior citizens struggle to use smartphones due to a lack of exposure or guidance.

This limits their ability to connect, access digital services, and remain informed.

Meanwhile, younger generations often do not invest time in supporting them.

Hence we must bridge the gap in between them

# BRIDGE THE DIGITAL DIVIDE ACROSS GENERATIONS

- Empower seniors to use smartphones independently
- Teach communication, internet, and digital safety
- Promote intergenerational bonding

# IMPLEMENTATION STEPS

- Identify interested grandparents or elderly groups
- Create beginner-friendly modules
- Conduct in-person training sessions
- Use visuals and practical demonstrations

# POSITIVE IMPACTS

- Seniors gained digital confidence
- Better family communication
- Safer online behavior
- Emotional bonding between grandchildren and grandparents
- Sense of pride and independence among seniors

# CONCLUSION

“Grand Connect: where small efforts spark big changes. By empowering tech skills and nurturing relationships, we’re bridging gaps and building bonds. Next step: taking this impact to even more communities and families.”
